HEALTH PROFILE CHURCHILL COUNTY, NEVADA, 2001

EXECUTIVE SUMMARY

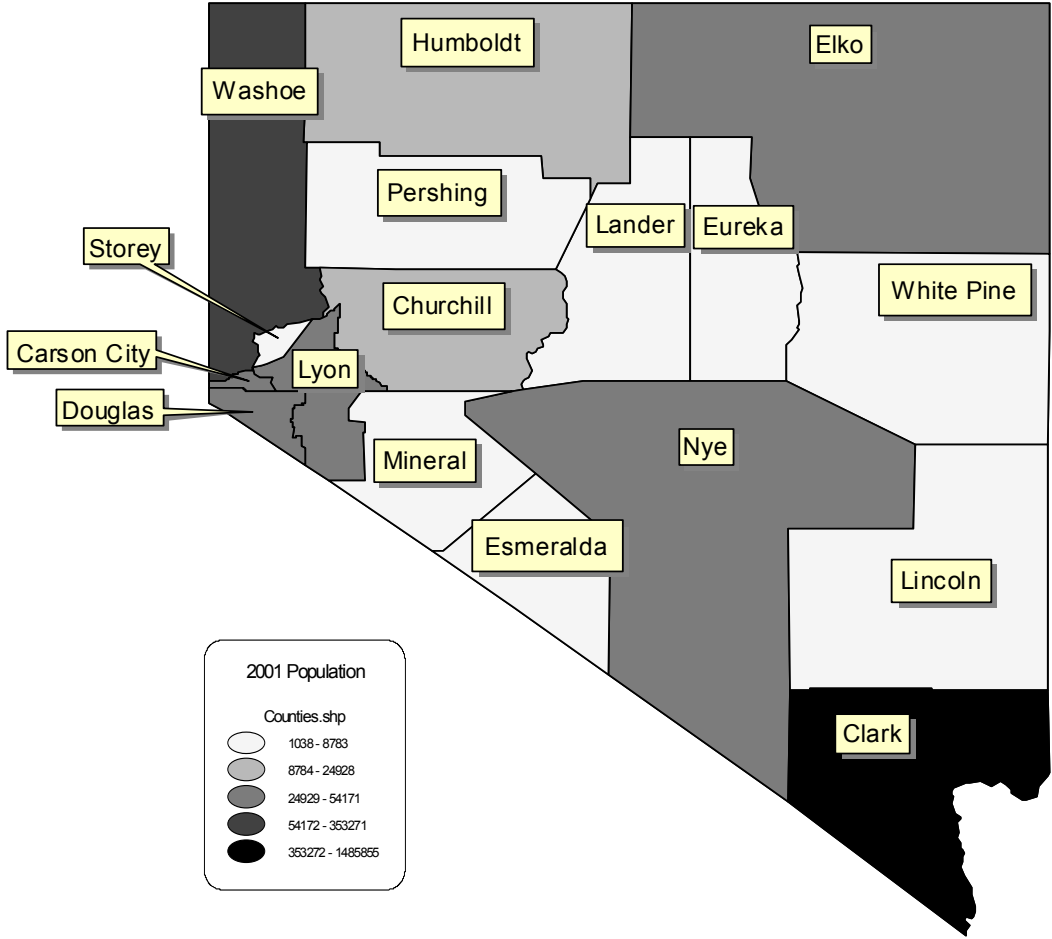

This report was prepared by the Bureau of Community Health (BCH), Nevada State Health Division. The purpose of the report is to provide information to policy makers, grant writers, medical providers, and administrators, and other parties interested in the health status of Churchill County and the State of Nevada. The data is organized into sections by providing basic demographics, socioeconomic status, births, deaths, chronic diseases and risk factors, infectious diseases, injuries, preventive services for children and adults. For most health indicators, data for Churchill County were compared to the statewide data and Healthy People (HP) 2010 targets.

Churchill County had a 36% increases in population from 1991 to 2001. In 2001, the population of Churchill County was 24,928 accounting for 1.2% of the total state population (2,132,498) of Nevada. Churchill County has a higher percentage of people in the 1-17 age group and a lower percentage of people 18-64, a lower rate of non-white population, and a higher unemployment rate compared to the State of Nevada. Population projections show that there will be an increase in the non-white population by the year 2010.

The following table is a summary of the current health status of Churchill County compared with HP 2010 targets. Details can be found later in the report under the respective sections.

Health Indicators	HP 2010 Targets Met ★	HP 2010 Not Met ▲
BIRTHS	1. Teen Mothers	1. Low Birth Weight 2. Pre-term Birth 3. Prenatal care in the 1st trimester
DEATHS	1. Infant Mortality rate 2. Neonatal infant mortality rate 3. Post-neonatal mortality rate 4. Mortality rate due to prostate cancer 5. Mortality rate due to COPD 6. Mortality rate due to Diabetes Mellitus	1. Mortality rate due to all cancers 2. Mortality rate due to trachea, bronchus, & lung cancer 3. Mortality rate due to breast cancer 4. Mortality rate due to cervical cancer 5. Mortality rate due to colorectal cancer 6. Mortality rate due to stroke
CHRONIC DISEASES MAJOR RISK FACTORS	1. Physical inactivity rate	1. Cigarette smoking rate 2. % of people trying to lose weight 3. High blood pressure rate 4. Cholesterol checking rate
INFECTIOUS DISEASES	1. AIDS 2. Hepatitis A 3. Hepatitis B 4. Hepatitis C 5. Mumps 6. Rubella 7. Meningitis (bacterial) 8. Meningococcal disease 9. Tuberculosis	1. Chlamydia 2. Gonorrhea
INJURIES	1. Homicide 2. Suicide	1. Motor Vehicle Injuries
PREVENTIVE SERVICES USE	1. Mammogram for women 40 years and older in the preceding 2 years 2. Pap smears for adult women	1. Immunization Coverage in 2-year old children 2. Pneumococcal pneumonia vaccination for adults 3. Influenza vaccination for adults in the past 12 months

FIGURE 5 Population Increase (%) from 2001 to 2010 by Gender

Data source: Nevada State Demographer, 2002

FIGURE 6 Population Increase (%) from 2001 to 2010 by Age Group

Data source: Nevada State Demographer, 2002

FIGURE 7 Population Increase (%) from 2001 to 2010 by Race/Ethnicity

Data source: Nevada State Demographer, 2002

- Population projections for 2010 predict that Churchill County will grow at a lower rate (7%) than the State of Nevada (26%).
- Population projections for 2010 predict that all non-white populations will increase.

SOCIOECONOMIC STATUS

TABLE 4 Socioeconomic Status

		Churchill County	Nevada
Households (2000) ¹	Total households (2000) ³	8,912	751,165
	Family households (families) (%) ⁴	73%	66%
	Nonfamily households (%) ⁵	27%	34%
	Households with individuals under 18 years (%)	40%	35%
	Households with individuals 65 years and over (%)	23%	21%
	Average household size ⁶	2.64	2.62
Income (2000)	Median household income	\$38,009.00	\$39,280.00
	People of all ages in poverty (%) ⁸	11%	11%
Unemployment rate (%) ²	2001	8.7	5.3
	2000	8.2	4.1
	1999	8.6	4.4

Data source: ¹ US Census Bureau, Census 2000² Nevada Department of Employment, 2002

Note:

³A household includes all of the people who occupy a housing unit. People not living in households are classified as living in group quarters.⁴A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family.⁵A householder living alone or with nonrelatives only.⁶A measure obtained by dividing the number of people in households by the total number of households (or householders).⁷Represents 90% confidence interval⁸Poverty can be determined based on the poverty thresholds (see technical notes for POVERTY)

- Churchill County had a higher percentage of households (73%) compared to the State of Nevada (66%) in 2000.
- The median household income in Churchill County was slightly lower than in the State of Nevada in 2000.
- Churchill County consistently had higher unemployment rates from 1999 to 2001 compared to the State of Nevada.

BIRTHS

Data source: Bureau of Health Planning and Statistics, Nevada State Health Division, 2002

Note:

¹LBW: Low Birth Weight (<2,500 grams);²VLBW: Very Low Birth Weight (<1,500 grams);³Preterm births: Births are <37 weeks of gestation;⁴Teen mothers: Mother's age is younger than 18 years old;⁵Older mothers: Mother is older than 40;⁶NA indicates data that is unavailable due to cell size less than 5. See technical notes for data confidentiality.

★ Indicates "HP 2010 target was met" for 2001 for the county

▲ Indicates "HP 2010 target was not met" for 2001 for the county

- The total births for residents of Churchill County in 2001 accounted for 1.1% of the total births in Nevada.
- The HP 2010 target for teen mothers was met by Churchill County and the State of Nevada in 2001.
- The HP 2010 targets for LBW, preterm births, and prenatal care in the first trimester were not met by Churchill County in 2001 or the State of Nevada in 2001.
- The HP 2010 target for VLBW was not evaluated since there were less than 5 cases reported in Churchill County in 2001.

Data source: Bureau of Health Planning and Statistics, Nevada State Health Division, 2002

Note:

¹ NA* indicates data that is unavailable due to cell size less than 5. See technical notes for data confidentiality.² Others* represents causes of death other than the 15 leading causes of death including heart disease, cancer, stroke, chronic lower respiratory disease, accidents, influenza and pneumonia, diabetes mellitus, HIV diseases, suicide, chronic liver diseases and cirrhosis, nephritis, nephrotic syndrome and nephrosis, septicemia, Alzheimer's Disease, homicide & legal intervention, and atherosclerosis.³ Respiratory Disease* represents chronic lower respiratory diseases.⁴ Liver Disease* represents chronic liver disease and cirrhosis.⁵ Kidney Disease* represents nephritis, nephritic syndrome, and nephrosis.

- Accidents were the leading cause of death in the 1-14, 15-24 and 25-44 age groups in Churchill County for 1999-2000.

CHRONIC DISEASES: CONDITIONS AND RISK FACTORS

- In 2001, Churchill County had a higher hospital admission rate for flu and pneumonia than the State of Nevada. Churchill County also had a higher percentage of smokers, heavy alcohol consumers, and those who engage in less physical activity, and more who go without checking their cholesterol than those across the State of Nevada.
- In the Nevada BRFSS 2001 survey, 2,570 people (1,307 male, 1,263 female) were included. Out of the 2,570 people, 64 lived in Churchill County (30 male, 34 female).
- In the Nevada BRFSS 2000 survey, 2,100 people (1,044 male, 1,056 female) were included. Out of the 2,100 people, 66 lived in Churchill County (27 male, 39 female).
- For alcohol beverage consumption rate, no US nationwide data and HP 2010 targets were available
- For physical activity and fitness, no US nationwide data were available

INFECTIOUS DISEASES

TABLE 9 Reported Infectious Disease Case Rates per 100,000 Population, 1999-2001

Infectious Diseases	Churchill County			Nevada			Healthy People 2010 Targets	
	1999	2000	2001	1999	2000	2001		
Acquired Immunodeficiency Syndrome (AIDS)	0.0	⁴ NA	0.0	12.1	13.3	10.5	1.0	★

Data source: HIV/AIDS Reporting System (HARS), STD-MIS, and National Electronic Telecommunications Surveillance System (NETSS)

provided by Bureau of Community Health, Nevada State Health Division, 2002

Note: ¹Prevalence rate per 100,000 population for Chlamydia is HP 2000 target. No HP 2010 target for prevalence rate per 100,000 population for Chlamydia is available

²HP 2010 target is 2.4, 5.1, and 3.8 cases per 100,000 population for age groups 19-24, 25-39, and 40+, respectively.

³HP 2010 target is 2,000 cases nationwide for children under 7 years of age. No HP 2010 target rate is available

⁴NA indicates data that is unavailable due to cell size less than 5. See technical notes for data confidentiality.

★ Indicates "HP 2010 target was met" for 2001 for the county

▲ Indicates "HP 2010 target was not met" for 2001 for the county

- Data presented in the table only reflects reported cases. Some diseases such as Hepatitis may be very under-reported indicating a need for increased surveillance.
- In 2001 Churchill County met HP 2010 targets for AIDS, Hepatitis A, Hepatitis B, Hepatitis C, Mumps, Rubella, Meningitis, Meningococcal disease, and Tuberculosis.
- In 2001 Churchill County did not meet HP 2010 targets for Chlamydia and Gonorrhea.
- HP 2010 objectives were not reviewed for those infectious diseases for which in 2001 there were fewer than 5 cases. These were Campylobacteriosis, *E. coli*, and Salmonellosis.

INJURIES

TABLE 10 Injury Death Rate per 100,000 Population, 1999-2001

	Year	Churchill County	Nevada	Healthy People 2010 Targets	
Homicide	1999	¹ NA	8.2	3.0	
	2000	¹ NA	6.2	3.0	
	2001	0.0	8.8	3.0	★
Suicide	1999	31.8	20.6	5.0	▲
	2000	21.4	19.2	5.0	▲
	2001	4.2	18.2	5.0	★
Motor Vehicle Injuries	1999	20.3	15.0	9.2	▲
	2000	54.0	13.2	9.2	▲
	2001	25.6	15.3	9.2	▲

Data source: Bureau of Health Planning and Statistics, Nevada State Health Division, 2002

★ Indicates "HP 2010 target was met" for 2001 for the county

▲ Indicates "HP 2010 target was not met" for 2001 for the county

¹NA indicates data that is unavailable due to cell size less than 5. See technical notes for data confidentiality.

- Death rates per 100,000 population for Churchill County and Nevada and HP 2010 targets are age-adjusted rates (year 2000 standard population)
- In 2001, Churchill County reached HP 2010 targets for homicide and suicide but the State of Nevada did not.
- In 2001, neither Churchill County nor the State of Nevada met the HP 2010 target for motor vehicle injuries.

PREVENTIVE SERVICES USE

IMMUNIZATION COVERAGE LEVELS IN CHILDREN

Data source: Bureau of Community Health, Nevada State Health Division, 2002

* Four or more doses of Diphtheria and Tetanus toxoids and Pertussis vaccine, 3 or more doses Poliovirus Vaccine, and one or more doses of Measles-Mumps-Rubella vaccine

- The data for Churchill County is from the public health clinic only. It does not reflect the complete vaccination coverage level in Churchill County.
- The data for Nevada and the US were obtained from the National Immunization Survey for Children 19-35 months of age. Data has not yet been released for 2002.
- The Healthy People 2010 target is for children 19-35 months of age.

ADULT PREVENTIVE SERVICES USE

Data source: Nevada State Behavioral Risk Factor Surveillance System (BRFSS), 2000 & 2001, provided by the Bureau of Health Planning and Statistics, Nevada State Health Division, 2002

Note:

MAM: Mammogram for women 40 years and older in preceding 2 years (2000 BRFSS)

PAP: Pap smears for adult women (2000 BRFSS)

PNEUMO: Pneumococcal pneumonia vaccination for adults (2001 BRFSS)

FLU: Influenza vaccination for adults in the past 12 months (2001 BRFSS)

- In the Nevada BRFSS 2001 survey, 2,570 people (1,307 male, 1,263 female) were included. Out of the 2,570 people, 64 lived in Churchill County (30 male, 34 female).
- In the Nevada BRFSS 2000 survey, 2,100 people (1,044 male, 1,056 female) were included. Out of the 2,100 people, 66 lived in Churchill County (27 male, 39 female).
- Churchill County and the State of Nevada had very low self-reported adult vaccination coverage for influenza and pneumonia compared to the HP 2010 target.

MENTAL HEALTH

There are 18 clinics that comprise the Mental Health Rural Clinics service delivery system. Each clinic has a combination of psychiatrist(s), psychologists, clinical social workers, mental health counselors, psychiatric caseworkers, and support staff. Each clinic provides an array of mental health services on an outpatient basis such as individual, couple, and family therapy, group therapy, medication clinic, service coordination, psychological testing, psychosocial rehabilitation, housing services, emergency services, and consultation and education. Many clinics also have substance abuse counselors.

TABLE 11 Mental Health Case Loads in Churchill County, Fiscal Years 2001 & 2002

	Fiscal Year 2001	Fiscal Year 2002
Average Monthly Active Cases	214	257
New Admissions	162	218
Total Admissions	198	296

Data source: Division of Mental Health and Developmental Services, Rural Clinics Community Outpatient Services, 2002

Data source: Division of Mental Health and Developmental Services, Rural Clinics Community Outpatient Services, 2002

TECHNICAL NOTES

1. RACE AND ETHNICITY

In this report, "Native" refers to American Indian, non-Hispanic populations; "Asian" refers to Asian/Pacific Islander, non-Hispanic populations; "Black" refers to African American, non-Hispanic populations; "White" refers to White, non-Hispanic populations; "Hispanic" includes all races with a Hispanic ethnic origin. No duplicate counting exists.

2. POPULATION DATA

All Churchill County and Nevada population data were based on the database established by the Nevada State Demographer's Office and provided by the Bureau of Health Planning and Statistics, Nevada State Health Division.

3. CRUDE RATE

Crude Death Rate = Number of Deaths / Population x 1,000 or 100,000

(This rate calculation was applied to infant mortality rate, neonatal mortality rate, and post-neonatal mortality rate)

Crude Incidence Rate = Number of New Cases of Specific Disease / Population x 100,000

(This rate calculation was applied to the rate of infectious diseases per 100,000 population)

4. AGE-ADJUSTED MORTALITY RATE

Age-Adjusted Mortality Rate = Total Expected Number of Deaths / Total Standard Population x 100,000

(This rate calculation was applied to the mortality rate of leading causes of death and injuries in this report. Health People 2010 targets for mortality rates of leading causes of death and injuries are also age-adjusted rates. For all three-year's, 1999-2001 age-adjusted rate calculations, the age was adjusted to the year 2000 standard population.)

5. DATA CONFIDENTIALITY

According to the data confidentiality policy of the Nevada State Health Division, sensitive cases (number of reported cases equal to or less than 5) are not allowed to be reported for general publication. Further information for internal use can be provided by the Bureau of Community Health upon request.

6. SAMPLE SIZE FOR BRFSS IN CHURCHILL COUNTY

In the Nevada BRFSS survey, 66 and 64 Churchill County residents participated in the survey in 2000 and 2001 respectively. The sample size may not be ideal to represent Churchill County's population and caution should be used when interpreting BRFSS survey responses.

7. POVERTY

How the Census Bureau Measures Poverty

Following the Office of Management and Budget's (OMB) Statistical Policy Directive 14, the U.S. Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation using the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and does not include capital gains and noncash benefits (such as public housing, Medicaid, food stamps). Poverty is not defined for people in military barracks, institutional group quarters, or for unrelated individuals under age 15 (such as foster children). They are excluded from the poverty universe – that is, they are considered neither as "poor" nor as "nonpoor."
